Development History

The Introduction of Sweet Potato & Glass Noodles

- **Sweet Potato Introduction**

The sweet potato or sweetpotato (*Ipomoea batatas*) is a dicotyledonous plant that belongs to the bindweed or morning glory family, Convolvulaceae. Its large, starchy, sweet-tasting, tuberous roots are used as a root vegetable. The young shoots and leaves are sometimes eaten as greens.

- **Nutritional Value of Sweet Potato**

Sweet potatoes are a rich source of fibre as well as containing an array of vitamins and minerals including iron, calcium, selenium, and they're a good source of most of our B vitamins and vitamin C. One of the key nutritional benefits of sweet potato is that they're high in an antioxidant known as beta-carotene, which converts to vitamin A once consumed.

- **What is Glass Noodles?**

Glass Noodle is one of the Common Food in China. It is a kind of filamentous food made of Starch from Beans, Sweet Potatoes, Potatoes, with various shapes as Bold, Thin, Round, Flat, Square and Flake etc. The Diameter size < 0.5 mm, we call it as Silk Glass Noodles, the main raw materials are Mung Beans Starch, Sweet Potato Starch, Corn Starch. The main nutrition content: Protein, Fat, Starch, Carbohydrate

Hot and Sour Glass Noodles Introduction

" Hot and Sour Glass Noodles" is one of the traditional snacks originated from Chongqing & Sichuan city in China ,it widely spread to the urban and rural areas in China and became a popular food among the folk since then. the Glass Noodles cake is made of 100% natural sweet potato starch, it named after the prominent sour & spicy flavor, it became very popular as a Snack and Convenience Food. it is also an ingredient for Chinese household when preparing hot pot party both at home and restaurants due to its Spiciness ,Freshness, Fragrant, Sourness and Non-oily. it' s a natural Green Convenience Food and can be prepared separately for easy carrying .

You can enjoy this delicious food anywhere and anytime you like.

Self-heating Hotpot Introduction

Hot pot, named as "antique soup" in ancient times for the boiling sound, is originally created in China as gourmet and popular by all generations.

Hot pot generally refers to a cooking method of boiling all kinds of food with heat, water or soup, and also refers to the POTS and utensils used in this cooking method. It is characterized by cooking while eating, or the pot itself has the effect of heat preservation, eating when the food is still steaming. There are similar dishes all over the world, but they are especially popular in East Asia.

Typical hot pot ingredients include all kinds of Meat, Seafood, Vegetables, Soy products, Mushrooms, Eggs, Glass Noodles, Staple Food, etc., which are put into boiling water or special stock pot and cooked until well-cooked.

Advantages of Self-heating Hot pot: Fast, Convenient, Economical and Delicious

Self-heating Hot pot is a new type of Hot pot especially popular in recent years. It belongs to a type of Fast Food, No Fire or Electricity. It is mainly composed of food materials, pot for cooking, pot cover, outer pot and heating bag. In self-heating Hot pot, the bottom of the pot keeps separate from the ingredients, and most of the ingredients have been processed at high temperatures as pre-cooked food, fast and easy to cook well.

Self-heating Hot pot is a Convenient Food, which uses the heating bag to heat the pre-cooked ingredients. The heating principle is to use quicklime of heating bag heats up when it meets water. It immediately heats up in 5-10 seconds after it meets cold water. The temperature can reach above 90°C until boiling, and the temperature of steam can reach 110°C, then use water vapor to heat or cook food and keep it warm for up to 2 hours.

So the way to enjoy Self-heating Hot pot is very simple, as long as there is water.

***You can enjoy Hotpot anytime and anywhere,
whether with family and friends or by yourself alone.***
